# All About Android

- 2008 Google set up an alliance of 84 phone companies to develop common software for mobile phones.
- That was everyone except Apple, to compete with the iPhone software.
- Microsoft, Nokia and Blackberry tried and failed to do their own thing.

Each Manufacturer has added their own features to Android.

So they all behave a little differently because everyone added their own features.

Samsung

Motorola

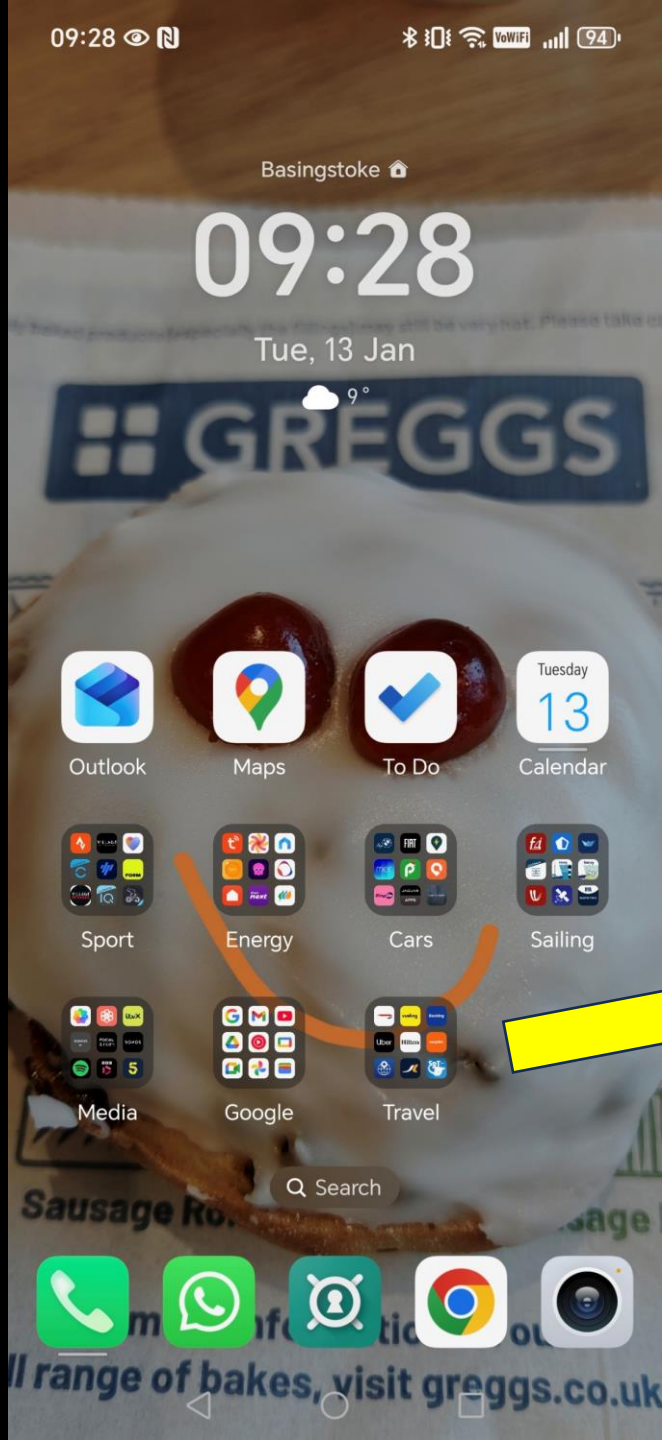

Honor

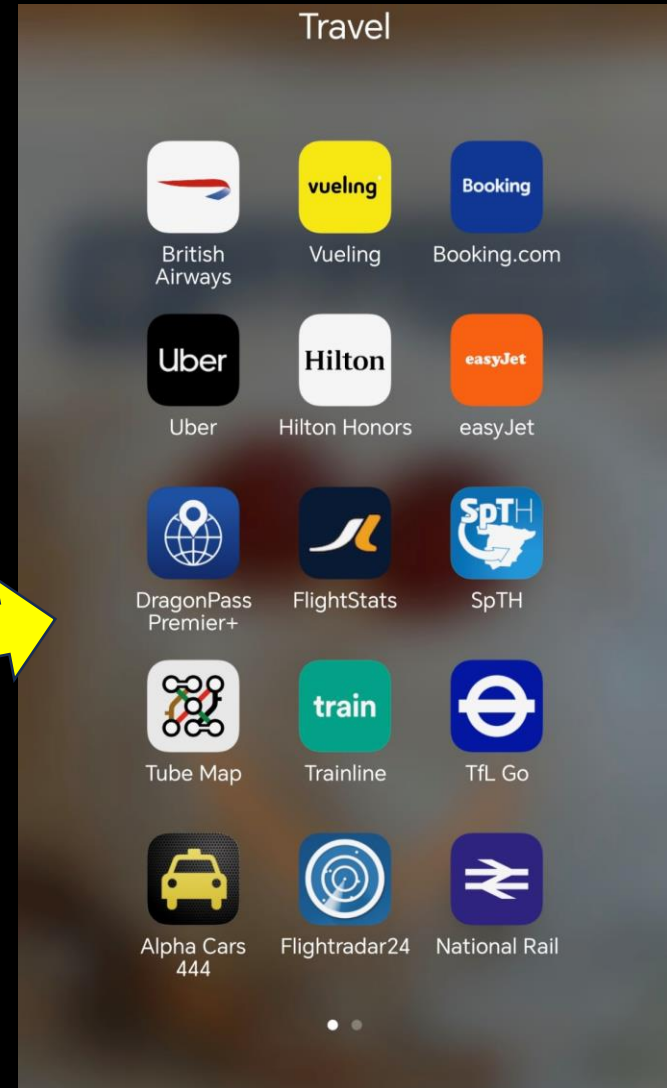

Foldable phones

# Common features

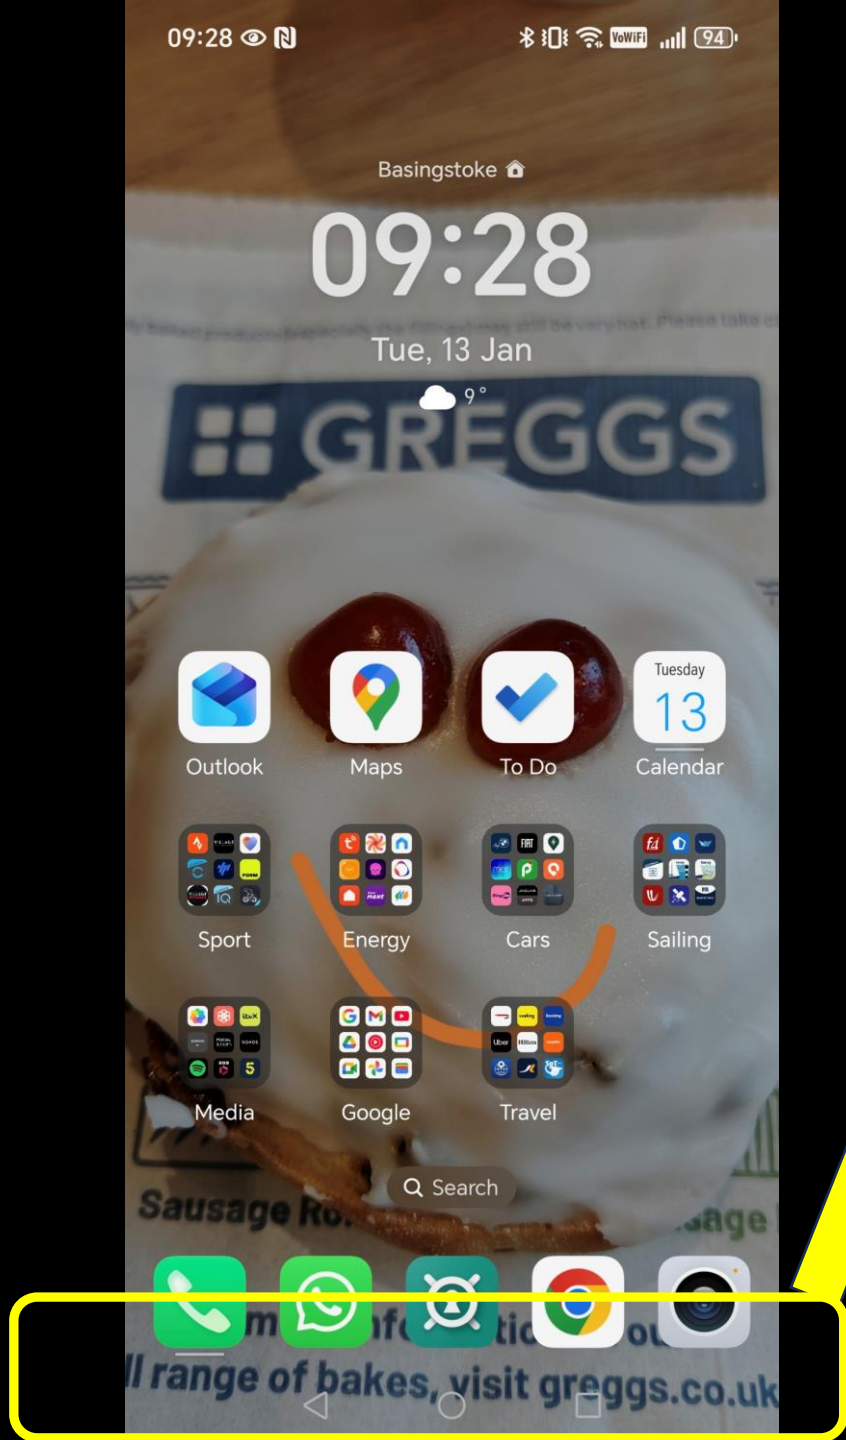

- The Home screen
- Organising Apps into folders
- Navigation Bar

# Folders

# Navigation Bar

Back

Home

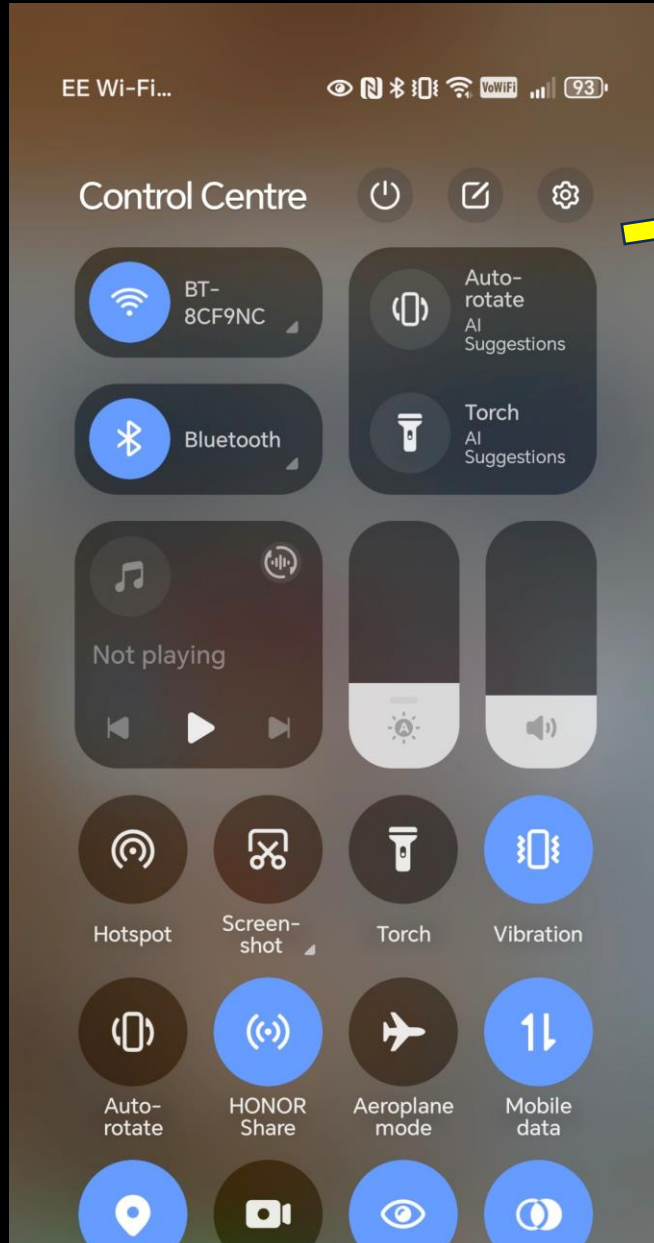

Tasks (Honor/ Huawei/Google pixel)

Tasks (Samsung)

# Setting Shortcuts

Swipe down top right

## Settings

Search
